Summary

Software Engineer and Flutter Mobile Developer with experience building scalable mobile applications and web dashboards. Strong background in Clean Architecture, state management, , local storage management, and RESTful API integration. Experienced in developing production-ready mobile systems, real-time features, and modern user interfaces. Skilled in collaborating with cross-functional teams to deliver reliable and maintainable software solutions.

Experience

Flutter Mobile Developer | Rand Company

Nov 2024 – Present

Flutter Mobile Developer | Frontend Web Developer (Vue.js)

2023 – Present

- Developed and maintained production-ready **mobile applications using Flutter** and **web dashboards using Vue.js**.
 - Built clean, responsive, and user-focused interfaces for both mobile and web platforms.
 - Integrated RESTful APIs, handled authentication, real-time updates, and error management.
 - Applied **Clean Architecture** and **BLoC** state management to ensure scalability and maintainability.
 - Collaborated with backend engineers and designers to deliver complete software systems.
-

Selected Projects & Contributions

Doremi — Media Streaming Mobile Application

- Developed a Flutter mobile application supporting audio and video streaming.
 - Implemented background playback and handled app lifecycle states.
-

TruckLink — Transportation Management Platform

- Developed a **Vue.js dashboard** for factories, transport companies, and administrators.
- Built a **Flutter Driver Mobile Application** with **WebSocket-based real-time updates**.

- Integrated **GPS location tracking** to monitor driver movement and shipment status.
-

E-School — School Management System

- Developed **Flutter mobile applications** for **students and teachers**.
 - Built a **Vue.js admin dashboard** for managing schools, users, courses, and school's operations.
 - Implemented role-based access workflows, focused on usability and stability for daily educational use.
-

Additional Projects

- **Jobly**: Job search application connecting employers and job seekers.
 - **Imaniyat**: Islamic mobile application including Quran, prayer times, zakat calculator, qibla compass, and digital tasbeeh with custom animations.
 - **The Consultant**: Mobile application for booking professional consulting services.
 - **Atmata**: Quiz application for student self-assessment.
 - **Bookly**: Book browsing and discovery application.
-

Education

Damascus University

Bachelor's Degree in Information Technology Engineering

Specialization: **Software Engineering**

Graduated: **2025** / GPA: **85%**

Technical Stack & Skills

Mobile Development

- Flutter, Dart
- State Management: BLoC, GetX, Cubit
- Responsive layouts (Mobile, Web, Desktop)

Frontend Web Development

- Vue.js, Vite, HTML, CSS, JavaScript
- Admin Dashboards & Data-Driven Interfaces

UI/UX & Design

- Figma (UI design, wireframes, prototyping), translating designs into pixel-accurate implementations

Architecture & Software Engineering

- Clean Architecture
- MVVM, MVC
- OOP
- SOLID Principles

Backend & Real-Time Communication

- RESTful APIs integration
- WebSockets (real-time updates)
- GPS & Location Services integration

Databases & Cloud

- Firebase/Supabase
- Sqlite/Hive/Get Storage/Shared Preferences/Secure Storage

Tools & Platforms & Version Controlling

- Git, GitHub, GitLab
- Jira/ClickUp
- Linux

Other Skills

- Problem Solving & Algorithms (DCPC Finalist)
- Debugging & Performance Optimization
- Agile / Scrum Methodologies
- Requirements Engineering
- Software Development Life Cycle (SDLC)
- Testing (White Box / Black Box)
- App Deployment (Google Play Store, App Store, versioning, release management)
